PROFESSIONAL PROFILE

Computer Engineer with a master's degree in Computer and Automation Engineering, Cybersecurity track, and over 15 years of experience as a Full Stack Developer, Project Manager and technical consultant. Specialised in developing tailored digital solutions, CRM, web/mobile applications, responsive sites and custom platforms with technologies such as Laravel, PHP, WordPress, JavaScript, MySQL and Bootstrap. He has worked with companies including Seometrics, Atomic Consulting and Reverse Studio, handling software development, project management, technical coordination, IT security and the evolutionary maintenance of digital platforms. He also teaches computing subjects in upper secondary schools, covering Computer Science, TPSIT and Systems and Networks, with experience in lab activities and as a tutor on FSL projects (formerly PCTO). He combines technical skills, strategic vision and organisational ability, with a strong focus on problem solving, innovation and achieving objectives.

SKILLS AND COMPETENCES

- Development of custom web solutions, CRM, web/mobile applications and responsive websites.

Antonio Morlino

Computer Engineer · Full Stack Developer & Project Manager
